A SINGULAR ACCEDENT FROM COTE KNAYERY.—A day or two since, a plumber in the West Division purchased a lot of old lead pips from some boys, and the next day he proceeded to melt up the same, assisted by a young lad. While thus employed, a saddan explosion took place among the hesting and melting lead, severely burning both the operators. From appearances, they found they were scalded as if by steam, and this was shown to be the case, a section of tuch lead pipe having been filled with water by the knavish young venders, in order to realize a greater weight. To do this, both ends of the pipe had been hammered close and fast. If was a sovel mode of cheating, and came near being serious to the victims.

was prought up the decision on the motion of the defendant for a change of renue in the cell-brated Burch Divorce Case.

In her application, the defendant saks that the hearing may be removed from a community strongly prejudiced against her, and the pleintiff acceding to this, it only remained to settle to which county the case about do taken.

By the decision agreed upon yesterday, it goes to Naperville, Dul'age county, before ladge Norton, the trial to take place early in November next. It will prove in all respects one of the most remarkable trials in the annals of our Courts, not only from the wealth and standing of the parties, but the determination with which the case will be fought.

A Nobic Benefit.

We can but refer to it with pride as a noble triumph of beavolence in our city, the circumstances that the net receipts of the Great Connect at the Wigwam for the benefit of the Tornsdo sufferers was upwards of Misen Aundred dollars, probably and indeed certainly the largest sum area realized by a beneficiary concert night west of the Lakes.

The Concert Committee dispatched Rev. Mr. Collyer yesterday morning with \$1500 in cash, with directions to take the line of the tornsdo at Lee Ceutre, it Illipois, and follow it to the Misslasippi, relieving all sufferers found in its track.

This aplendid schievement is added to what our citizens have munificently done in other directions, making the whole sum realized in behalf of the unfortunite victims by the Great Tornsdo, is the neighborhood of eight thousand dollars. We feel a just pride in such a response from our citizens to the appeal for sid, and it is a result that would do honor to any city in the land, of fer more years of growth than ours, and our superior in population.

are no fewer than four other, different weights, or seven distinct standards in the United States. In Oats the variation is from 39 pounds in Connecticut to 35 pounds in Washington Territory, 32 pounds used to be our legal weight, but the last legislature seduced it to the New Jersky standard, 30 pounds. Indian Corn varies from 50 pounds in Illinois to 58 pounds in New York, in Fennaylvania, and 50 pounds in Illinois to 58 pounds in New York, in Fennaylvania, and 50 pounds in Kestucky. Cloverseed and Wheat vary only from 60 to 64 pounds. Potatoes are uniformly 60 pounds in all the States, but Dried Apples wary from 34 pounds. Potatoes are uniformly 60 pounds in all the States, but Dried Apples wary from 50 pounds in 10wa to 33 in Wisconsui, and Dried Peaches from 38 in Wisconsui to 53 pounds in 10wa. We have given here but a slight specimen of the goneral discord. If a man takes up the prices current in one city, and buys by telegraph 1000 bu. Barley in New Orleans, because the cost in a triffe lower than in Philadelphia, he finds that he losis more than one férire in quantity by an act of the Legislature of Loumann. Of course the effect of this is to make each State put the number of pounds to the bushel lower and lower, without any regard to one standard measures. effect of this is to make each State put the number of pounds to the bushel lower and lower, without any regard to one standard measure. In oats, for instance, from thirty-four to thirty-six pounds is often the actual weight per bushelist this State. But instead of taking the best, the seers is made the standard. This can herely have a good effect upon our farmers, who sught to feel that their crops of oats are below the mark if they do not come up to 34 lbs. If a man buys a lot of dried peaches in Wisconsis, and undertakes to relial them out by measure, he will probably find the 28 lbs fall at least fire pounds of actual loss in each bushel measured. But if he buy in lows, he will savathis. But in dried apples the gain will be four pounds if he buy in Wisconsis. dried apples the gain will be four pounds if he bay in Wisconsin.

In France they have a decimal system applied to everything measured. It is fixed, uniform and convenient. But if a house in Chicago should ship a vessel toaded with buck wheat, by the St. Lawrence to Liverpool, and another house in Philadelphia should do the same thing, there would be a difference of eight pounds weight, or one-sixth in every bushel shipped from the two ports. There is no reason why Congress should not legislate in this matter, and make a uniform decimal system for the country and all the Sistes.

The tramed Experiment.

The experiment thus far with the councis introduced in Texas, and other parts of the South, may be said to be excessed. At first it was supposed they could only be useful in travaring the great dearts and plains in the interior of the continent, where there is a deficiency of water. They could cross a desert of a hundred miles without water and without parts. This of itself would be secomplishing much. But it now appears that this useful animal has been introduced on plantations with advantage, having double the strength of the mule or horse. We bether hitched to a plough or a wag-on he does equally well, and cas carry on his

Mr. Russell—Then if Virginia is constrained to silence, that silence may be ominous.

A long discussion ensued on various points of order, when Mr. Sau'sbury of Del. moved to adjour still 4 o'clock. Lost.

The Convention refused to second the previous quession on the amendment of Mr. Church of N. Y., to the motion of Mr. Howard, by syes 1074; nos. 1403.

The motion to take a recess till 5 o'clock was carried.

APPERMOON SERRICO. STEAM ENGINES, BOILERS, 40. Arrival of the Overland Mall—Serious Endian Troubles.

Semegrield, Mo., June 17—The Overland Mail with San Francisco advices to May 28th, arrived here at \$7.00 this evening, and lurnishes the following summary of news:

Sax Farkinson, May 28th.—The Peny Express, with St. Louis dates of May 20th, is due at Garson Valley this morning, but on account of Indian hostifities on the route for 200 miles beyond that point, it is feared the Express has been est off. The last Express left here on the 28th, but we are not advised whether it passed the dangerous portions of the route on its way easterdar.

The accounts from Garson Valley yeasterday, the 17th, represented that about 1,500 Indians remained in the vicinity of Pyramid Lake, and OAK ORCHARD These Springs are situated in the valley of the O

sary to unite all sections against the opposition party. [Applause and hisses from the
galleries.]

Mr. Hogo of Vieginia demanded to know
whether delegates were to all here and
submit to the issual of hisses from the
gallery when sentiments favorable to
their friends of the South, and in which
they themselves coincided, were expressed
by a gentleman of such respectability asMr. Randall of Pennsylvania. If this oulside
pressure was to be brought up to crush out
siarcess of discussion, Vieginia had better
know it at once and retire from the field in
which the was prevented from defending her
rights. [Loud applause.]

The President announced that if the galleries
gave niterance to such sigms of disapprobation,
they would be cleared.

Mr. Samuels of Iowa while anxious to preserve to every man libe right to be heard, he
could not but say that manifestations of applause were calculated to draw manifestations
of disanavars. Both should be sheeked or both
